CORE STACK

- > ASP.NET Core / .NET 4.8–10
- > Clean Architecture
- > Entity Framework Core
- > Dapper
- > ADO .Net
- > SQL Server / SSMS
- > JWT Authentication
- > Microservices & Ocelot API Gateway
- > Repository Pattern
- > Monolithic

ADDITIONAL SKILLS

- > Angular / React / Vue.js
- > Azure (OCR, Blob Storage, OpenAI)
- > Docker
- > SonarQube Quality Gates
- > Git (Git Hub, Git Lab)
- > Git Lab CI/CD
- > AI (Git Hub Copilot, OpenCode CLI, Cloud Code CLI, etc....)
- > Vercel
- > Swagger, Scalar, Postman
- > SVN
- > Team City, Octopus
- > Window Server
- > Microsoft 365

Profile

Results-driven .NET Backend Developer with hands-on 3 years' experience across banking technology, AI-integrated enterprise systems, and government digitization projects. Skilled in ASP.NET Core, Clean Architecture, EF Core, and SQL Server, with a track record of building secure, scalable APIs, integrating AI/OCR services, and resolving production issues under real-world constraints.

EXPERIENCE

Assistant Supervisor — CB Bank — Core Banking Department

Feb 2026 – Current

- Support core banking-related technology systems, working across third-party integrations and microservices in a banking technology environment.
- Work with the Ocelot API Gateway to manage routing and integration across microservices-based systems.
- Use Microsoft SQL Server Management Studio (SSMS) for data analysis, troubleshooting, and query support on banking-related systems.
- Support and maintain applications built on .NET Framework 4.8 and .NET 10, bridging legacy and modern technology stacks.
- Perform system troubleshooting and technical coordination between business requirements and technical implementation, supported by logging and monitoring practices.

Software Developer — Thetys Co., Ltd

Feb 2025 – Feb 2026

- Designed and implemented Master Data management for all entities, including integration with external APIs.
- Built authentication and authorization features, including admin account creation, login/logout, and JWT-based security.
- Fixed and optimized bugs across multiple microservices to improve system performance and reliability.
- Implemented SMS OTP verification and notification-sending features.
- Developed the CP Meiji Purchase Order AI System (.NET REST API, Vue.js, Azure OCR, OpenAI, Azure Blob Storage), converting a manual purchase-order process into an automated workflow.
- Built purchase order processing using OCR and OpenAI, validating AI-generated JSON output against complex business rules to ensure data accuracy.
- Managed Azure Blob Storage with SAS tokens to enforce private, controlled access to sensitive business documents.
- Engineered background job services for reliable order processing and integrated a LINE Channel for automated distribution of order data to stakeholders.
- Engineered an Intelligent Portal combining .NET REST API and AI capabilities to process business cards, purchase orders, and master PDF files.
- Improved API performance, resolved SonarQube quality gate issues, and dockerized backend services for consistent deployment.

Software Developer — Secure Link Company Limited

Sep 2024 – Feb 2025

- Developed the DOTP Project (Domestic Operator License System) using .NET Core, Angular, and SQL Server to digitize a government licensing process.
- Analyzed business requirements for government license workflows and developed modules for application, renewal, modification, and cancellation.
- Implemented business rules covering license extensions, route updates, vehicle type changes, and business suspensions.
- Applied the Repository Pattern and Clean Architecture, implementing account and role management systems to control workflow access by user type.
- Resolved production issues through debugging and rapid hotfix deployment, supporting system stability post-release.

EDUCATION

BSc (Hons) Business Computing & IS

First Class Honours — University of Central Lancashire (UCLan)

2026

HND in Computing – Level 5

I-Net College, Myanmar

2024

Languages

- › **Myanmar (Burmese):** Native
- › **English:** Intermediate (B1)

Freelance Developer — College Software Projects

2023 – 2024

- Worked independently with college-student clients to clarify requirements, design and develop software solutions, test functionality, resolve issues, and deliver completed systems end-to-end.
- Luxe-Look E-Commerce System — full-stack system (C# / .NET REST API, React.js, SQL Server) with product, category, order, and delivery management.
- Hospital Booking System — ASP.NET MVC and SQL Server backend supporting an admin dashboard, doctor scheduling, and booking workflows.
- Food Order Management System — ASP.NET MVC system covering order lifecycle management and daily sales reporting.

S U M M A R Y

I am also confident with my ability to work in a team in any circumstance of the time. I hereby declare that the above information furnished is true and complete to the best of my knowledge. Thank you for your attention. I'm looking forward to hearing your quick reply soon.

Grace Be to You;

Phyo Khant Kyaw
